## Key Facts About the College Bond-Funded Construction Program

Construction is ongoing for College of the Desert's capital program; therefore, this document is being updated bi-monthly.

Capital projects are made possible by Coachella Valley citizens through Measure B and Measure CC bonds. These bonds were approved under the requirements of California's Proposition 39, the Strict Accountability in Local School Construction Bonds Act.

## Palm Springs Development Project (Construction)

### Project Description

The planning and development of a new campus on approximately 27 acres of reclaimed land in Palm Springs. The campus will accommodate a combination of traditional instruction methodologies and hands-on technical education. Informed by industry partners and local stakeholders, the campus will establish and augment signature programs including Hospitality and Culinary Arts, Architecture, Digital Media and Media Production, Radio, and Healthcare. To accommodate these programs, Phase 1 of the project includes construction of an education Learning Hub containing flexible classrooms, meeting spaces, student services, maker spaces, science labs, and high-tech learning laboratories, along with a Culinary Institute and Events Center. The project is targeting LEED Gold Certification and will be designed as an all-electric campus with integrated photovoltaic/solar energy generation systems.

## Athletics Stadium and Fields (Construction)

### Project Description

The Athletics Facilities Feasibility study was completed in 2020, and identified a menu of options, which were prioritized and assembled into proposed phases. This phase will demolish the existing football stadium and construct a new 20,000 sf stadium building which will house team locker rooms and associated auxiliary spaces, a 3,000-sf weight room, sports official facilities, and support areas including equipment storage rooms, laundry, video, and IT rooms. In addition, the project will install new sports lighting at both the football and soccer fields and renovate an existing parking lot.

## Science Building Renovation Project (Construction)

### Project Description

The project scope includes the interior renovation and modernization of the Science Building, originally built in the early 1960's and partially upgraded in 2002. It is part of the campus's core complex of "historic" buildings. The intent is to preserve the original exterior architecture of the building while upgrading its structure and services to meet current codes. The existing building is approximately 15,025 gsf in size, of which 10,150 sf is considered assignable space. The project's current scope of work will require the demolition of the interior with a complete interior remodel, providing new laboratory and classroom spaces with the latest technology, finishes and lighting; all providing an enhanced instruction experience. Building support spaces, laboratory services and new staff offices will also be included with an efficient layout connected by minimal circulation/hall space to maximize space efficiency. The remodel includes the replacement of all utilities, electrical, gas, plumbing, mechanical systems, including new exhaust systems for the laboratory hoods. A new roof will be provided as part of the minimal exterior improvements.
