PROJECT STATUS REPORTS

Athletics Stadium and Fields (Design)

Project Description

The Athletics Facilities Feasibility study was completed in 2020, and identified a menu of options, which were prioritized and assembled into proposed phases. This phase will demolish the existing football stadium and construct a new 20,000 sf stadium building which will house team locker rooms and associated auxiliary spaces, a 3,000-sf weight room, sports official facilities, and support areas including equipment storage rooms, laundry, video, and IT rooms. In addition, the project will install new sports lighting at both the football and soccer fields and renovate an existing parking lot.

Palm Springs Development Project (Design)

Project Description

The planning and development of a new campus on approximately 27 acres of reclaimed land in Palm Springs. The campus will accommodate a combination of traditional instruction methodologies and hands-on technical education. Informed by industry partners and local stakeholders, the campus will establish and augment signature programs including Hospitality and Culinary Arts, Architecture, Digital Media and Media Production, Radio, and Healthcare. To accommodate these programs, Phase 1 of the project includes construction of an education Accelerator containing flexible classrooms, meeting spaces, student services, maker spaces, and high-tech learning laboratories, along with a Culinary Institute and Events Center. The project is targeting LEED Gold Certification and will be designed as an all-electric campus with integrated photovoltaic/solar energy generation systems.

Science Building Renovation Project (Pre-Bid)

Project Description

The project scope includes the interior renovation and modernization of the Science Building, originally built in the early 1960's and partially upgraded in 2002. Located on the College's Palm Desert campus, it is part of the campus's core complex of "historic" buildings. The intent is to preserve the original exterior architecture of the building while upgrading its structure and services to meet current codes. The existing building is approximately 15,025 gsf in size, of which 10,150 sf is considered assignable space. The project's current scope of work will require the demolition of the interior with a complete interior remodel providing new laboratory and classroom spaces with the latest technology, finishes and lighting, all providing an enhanced instruction experience. Building support spaces, laboratory services and new staff offices will also be included with an efficient layout connected by minimal circulation/hall space to maximize space efficiency. The remodel will include the replacement of all utilities, electrical, gas, plumbing, mechanical systems, including new exhaust systems for the laboratory hoods. A new roof will be provided as part of the minimal exterior improvements.

Indio Campus Expansion – New Building & Site Development (Construction)

Project Description

The expansion of College of the Desert's Indio Campus extends the campus site north of the existing building with the addition of a new 67,000 sf building, and site enhancements that include a new shade structure and flexible outdoor space between the buildings. The new building includes an enlarged Student Success Center, Public Safety facilities and Student Health Offices. It will significantly expand the instructional facilities with new classrooms, science laboratories, lecture halls, computer labs and a Maker Space, expanded faculty office space, a student dining commons and study spaces. The building will also have the necessary support and circulation spaces for maintenance of the Indio Campus, various informal social spaces along corridors, and a large outdoor deck space on the third level. Site improvements include parking lots, landscape buffers, and vehicular circulation for the new enlarged campus extents.

Indio Campus Expansion - Renovation (Construction)

Project Description

The expansion of College of the Desert's Indio Campus includes 10,000 sf of renovations to the existing building. Renovations include the removal of various campus level functions that are to be rehoused in the new building, the enclosure of the breezeway, and the conversion of the newly available spaces into additional instructional and student study spaces. Site improvements have included the removal of the temporary modular classroom buildings and resurfacing that portion of the parking lot.
